Addendum I SOR #2022-035 Public Radio Communications System Enhancements

Q1. How many hard copies of the response would the County like?

A1. Please provide 1 hard copy and 1 USB drive

Q2. For the GPS location display capability under section 2.3, does the County have a preferred monitor size to be located at each dispatch position?

A2. 24 inches

Q3. For the GPS location/mapping, is there an expectation that any field-based personnel or command staff would require access to this information from a mobile device?

A3. It would be nice, if available.

Q4. How many total named users will need login credentials for the GPS location/mapping system?

A4. The County currently has 12 positions. Please provide a breakdown on available number of licenses. And cost for additional ones.

Q5. Is the County able to provide a project timeline for the completion of the Youngs Mountain tower and shelter implementation?

A5. Not at this time.

Q6. For the Critical Connect option, how many mobile clients does the County anticipate being deployed?

A6. Up to 1200. Please provide breakdown and pricing for licenses.

Q7. Can the County elaborate on its anticipated use case for Wi-Fi based radio communications aside from radio management?

A7. In building coverage in our school system and maybe some large frequent use commercial buildings and county/city buildings.
